March 2022 FRONTEND ENGINEER AT BACK TECHNOLOGIES
January 2020

About Back: tech startup developing a web tool for people OPs teams // cross-functional product team consisting of six engineers on frontend and backend side, a product designer and a product owner

- Translating Figma designs into the frontend using React, TypeScript, Emotion CSS and CSX
- Connecting the frontend functionality to the GRPC API using Apollo GraphQL and Protobuf
- Developing reusable components and documenting them in Storybook
- Unit / integration tests with React testing library & Jest and end-to-end tests using Cypress
- Hiring tasks such as coding challenge reviews and technical interviews
- Improvements to frontend architecture and tooling in favor of developer experience or performance

December 2019 FRONTEND DEVELOPER AT NEUGELB
May 2018 STUDIOS (COMMERZBANK)

About Neugelb: midsized design studio // subsidiary of the Commerzbank // cross-functional team including the UI and UX designer, web developer, tester, project management and the content team

- Setup and implementation of web apps using: ReactJS, Gatsby, TypeScript / Flow, Redux, GraphQL and Styled Components
- Developing a component library for the Commerzbank web department in ReactJS
- Translating complex designs into frontend code and playing an interdisciplinary key position in the process of structuring and organizing new projects with the design team
- Building data models and managing content delivery over the headless CMS Contentful
- Creating NodeJS backends with REST APIs

May 2018 FRONTEND DEVELOPER AND UI/UX DESIGNER AT
March 2016 AUTENTEK

About Autentek: small software agency creating mobile and web applications // interdisciplinary role within a cross-functional team consisting of web and mobile developer, tester, and project management

- Developing frontends for various web application and hybrid web apps using Angular 2/4, Ionic 3, TypeScript, Bootstrap and jQuery
- Client communication, wire framing of concepts and new ideas, creation of graphics and icons for user interfaces

March 2016 APPRENTICE FOR MEDIA DESIGN AT AUTENTEK
2014

- Building static websites using HTML and CSS, focused on responsiveness & browser compatibility
- Basic JavasScript programming using jQuery to create multi-page applications
- Conceptualizing, designing and developing multiple hybrid mobile Apps using PhoneGab and Ionic (AngularJS)
